Trace table

Test Case	First Number	Second Number	Expected Result
1. **Normal Scenario**	14	35	7
2 **(Where one of the numbers is the HCF)**	7	49	7
3. **When the first number is bigger than second**	16	12	4
4. **No common factor except 1**	84	13	1
5. **Two numbers are the same**	5	5	5

SCREENSHOTS SHOWING THE RESULTS

1.

```
>>> %Run HighestCommonFactorPythonCode.py
First number: 14
Second Number: 35
The highest common factor is  7
```

2.

```
>>> %Run -c $EDITOR_CONTENT
First number: 7
Second Number: 49
The highest common factor is  7
>>>
```

3.

```
First number: 16
Second Number: 12
The highest common factor is  4
>>>
```

4.

```
First number: 84
Second Number: 13
The highest common factor is  1
```

5.

```
First number: 5
Second Number: 5
The highest common factor is  5
>>>
```
